Sod Installation Agreement

Please complete the form below for sod installation and submit via email, or complete by hand and fax completed form.

Before Installation:

West Coast Turf does not provide ground preparation services. Customer is responsible for preparing the installation site prior to sod installation by West Coast Turf.

_____ I take full responsibility for ground preparation of the area. The following is recommended by West Coast Turf:

For best result, rototill or spade the area to a depth of 4 to 6 inches. Eliminate drainage problems by having soil slope away from foundations, etc.

Rake in fertilizer, peat, compost, sand, etc. as needed to a depth of 3 to 4 inches. In the Desert Southwest and sandy soils, it is prudent to incorporate soil amendments into the top 2 to 4 inches of the soil profile. Gypsum should be applied at 50 lbs to 100 lbs per 1,000 square feet to help in the leaching of salts and buffering of soil pH. Incorporating a 6-20-20 fertilizer with minor elements is recommended at a rate of 10 lbs per 1,000 square feet. (Read label instructions on all soil amendments.)

Rake and smooth the soil, removing rocks, roots, and large clods. An automatic sprinkler system should be installed at this time before sod installation. Roll the area lightly with a lawn roller 1/3 full of water. This will firm the soil surface and reveal low areas that need more soil. Keep the grade 1 inch below sidewalks or driveway.

The day (or two) before installation, water the prepared area to settle soil and provide a moist but not flooded base for turf. Moistening to a depth of 6 inches is recommended for most soils.

_____ I understand that West Coast Turf will install sod with the grade presented by the owner of the project. If area is not ready to the customer's standards, West Coast Turf will charge a cancellation fee of \$250 and will return based on crew availability.

After Installation:

Begin watering within 30 minutes after installation. Turf is a living plant that requires ground contact and moisture to survive!

Select whether you want to keep excess sod or have West Coast Turf haul away.

Extra sod: Haul away _____ OR Leave leftover sod _____

*If we haul excess leftover sod away, you will still be responsible for the cost of the sod. The customer will be given a company credit for future purchase for the cost of labor only for the sod quantity not installed (this does not apply for an order that is under 2500 sq ft, for which no credit is available).

If you have any questions regarding this agreement please call customer service at 888-893-8873. Please visit us online at www.westcoastturf.com for information on how to care for your sod. Thank you for your business!
