

Platinum TE is used for sports fields, wall to wall on golf courses, and for home and landscape

West Coast Turf's Platinum TE is used around the world most prominently on projects facing challenges due to poor water quality and/or poor soils. This plant adapts to shorter mowing situations, like putting greens, by creating shorter, more compact nodes. Platinum TE also thrives well when left un-mowed and successfully filters water in areas like bioswales.

Features and Benefits

Color

- Bright green

Texture

- Fine

Performance

- Very high salt tolerance
- Aggressive spreading growth habit
- Good wear tolerance with moderate recovery
- Tolerant of most soil types, pH range 4.5-9.0
- Excellent drought tolerance
- Handles hard frosts better than bermudagrass
- With high nitrogen and lower mowing heights it exhibits good winter color in mild winter climates
- Shorter dormancy period and up to a month earlier green up than most bermudas
- Very good disease resistance in saline conditions
- Can thrive in low, boggy, high water table environments, and can withstand periodic short-term inundation with potable water or sea water
- Leaf blade has a waxy-wet look on one side and has an upright growth habit
- Exceptional drought tolerance

Shade tolerance

- Full sun to moderate shade tolerance
- Performs well under reduced light quality conditions such as rainy, cloudy, foggy, or smoggy environmental climates, but not in severe tree shade conditions

Climate

- Thrives in warm to hot climates USDA zones 7-11

Establishment and Maintenance

- Requires good quality water for establishment (30 days)
- Low maintenance
- For best performance, fertilize at annual rate of 2-3 lbs. N/sq. ft.
- Early fall and spring fertilization best. Summer fertility with high nitrogen is not recommended. Platinum likes potassium and calcium.
- Deep infrequent irrigations are best throughout the growing season

Mowing

- ½" – 2" but is most successful around 1 ¼."
- Can be left un-mown (roughly 6") in bioswale applications or slopes

Platinum TE at a glance

- Ideal for turf irrigated with effluent water and subject to naturally high saline conditions
- Golf tees, fairways and roughs
- For use on parks, home lawns, and recreational sports turf
- Low maintenance turf
- Erosion control
- Good for coastal sites influenced by salt
- Water saving

How to Specify Platinum TE Paspalum

Available as sod and stolons. Sod options are regular or big roll.

Options

- Regular sod comes in 16" x 72" 8 sq. ft. and 2' x 5' 10 sq. ft. rolls
- Big roll sod is 42" wide in various lengths allowing for large areas to be sodded quickly and efficiently. Great for parks, cemeteries, and large commercial lawns

West Coast Turf—A Full Service Company

We can install your new sod!

For larger projects, our skilled crews will use specialized high-tech equipment to install your new grass quickly and dependably. You can count on our experts to get it right the first time.

We can grow your special mix or blend!

Need a specific grass? Our knowledgeable crews can grow sod to meet your specific requirements.
